Professional Summary

Computer Science undergraduate specializing in **Data Science, Machine Learning, and AI**. Proficient in **Python, Data Analysis, and Statistics** with hands-on experience in **Pandas, NumPy, Scikit-learn, and NLP models**. Worked on impactful projects like **NLP Streamlit App** and **Stock Price Forecasting**. Skilled at leveraging **Generative AI tools** (ChatGPT, GitHub Copilot) to accelerate development. Passionate about applying DS/ML to solve real-world problems.

Experience

Mondee Tech

Oct 2025 – Dec 2025

AI & Data Engineering Intern

Hyderabad, India

- Developing **Agentic AI** applications across **healthcare, travel, and creator economy** domains using frameworks such as **AutoGen** and **CrewAI**.
- Building **RAG (Retrieval-Augmented Generation)** pipelines, managing **vector databases** (FAISS, Pinecone, Weaviate), and fine-tuning **LLMs** with **LoRA/PEFT**.
- Designing and optimizing **data workflows** for context retrieval, semantic search, and model knowledge integration.
- Collaborating with research and engineering teams to deploy **scalable autonomous agent systems** and improve inference efficiency.

Technical Skills

1. **Languages:** Python, Java, JavaScript, C, C++, HTML/CSS, SQL
2. **AI & Machine Learning:** Agent AI, Prompt Engineering, LLM Integration, NLP, Model Evaluation
3. **Tools:** Git, GitHub, GitHub Copilot, ChatGPT, VS Code, Eclipse, Android, Hugging face
4. **Databases/APIs:** MySQL, Firebase, REST APIs
5. **Testing:** Unit Testing, Integration Testing, PyTest, JUnit
6. **Frameworks:** Flask, Django, React, Angular

Projects

Retrieval-Augmented Generation (RAG) based Conversational AI | *LangChain, OpenAI API, FAISS, Python* May 2025

- Built an intelligent conversational AI system to process YouTube video transcripts with **90%+ answer relevance** using **Retrieval-Augmented Generation (RAG)** architecture.
- Automated transcript extraction and chunking from 100+ videos using **youtube-transcript-api** and LangChain's **RecursiveCharacterTextSplitter**.
- Implemented semantic search infrastructure using **OpenAI embeddings** and **FAISS vector database**, achieving sub-second query response times on large transcript datasets.
- Developed a custom **prompt engineering framework** that improved LLM factual accuracy by 25% and reduced hallucinations through context-aware response generation.

Heart Disease Prediction | *Python, Scikit-learn, Pandas, Matplotlib*

Sep 2024

- Developed a machine learning model to predict the likelihood of heart disease using clinical data.
- Performed **data preprocessing, feature selection, and normalization** for improved accuracy.
- Trained and compared multiple models (**Logistic Regression, Random Forest, KNN, SVM**) to identify the best performer.
- Visualized performance metrics and key features using **Matplotlib** for interpretability.

NLP Streamlit App | *Python, Streamlit, NLP*

Aug 2024

- Built an **interactive NLP app** for text classification, sentiment analysis, and keyword extraction.
- Implemented **Streamlit UI** for easy real-time text analysis with user input.
- Applied popular NLP libraries (**NLTK, spaCy, Scikit-learn**) to process and visualize results.

Edu-bond | *Flutter, MySQL, Node.js, REST APIs*

Oct 2024

- Developed a cross-platform educational resource sharing platform with **scalable, modular architecture**.
- Integrated **REST APIs** for resource management and **MySQL** for persistent data storage.
- Applied **clean code practices, SOLID principles**, and Git workflows to ensure maintainability.

AI-Assisted Development Experience

- Leveraged GitHub Copilot and ChatGPT to accelerate feature development, generate tests, and refactor code.
- Created and documented reusable AI workflows and prompts for consistent team-wide adoption.
- Used AI tools for architectural brainstorming, bug resolution, and automated documentation.

Operating Systems Expertise

1. **Concepts:** Process management, memory management, file systems, networking
2. **Custom ROMs:** Experience in flashing, modifying, and debugging Android ROMs
3. **Linux:** Proficient in command line, kernel modifications, and system administration
4. **Troubleshooting:** Skilled in diagnosing/resolving OS issues, crashes, and optimizations

Education

Indian Institute of Information Technology Kottayam <i>Bachelor of Technology in Computer Science and Engineering</i>	Nov. 2022 – May 2026 <i>Kottayam, Kerala</i>
---	--

Relevant Coursework

- | | |
|--------------------------------|--------------------------|
| 1. Data Structures | 5. Web Development |
| 2. Algorithms Design | 6. Computer Networks |
| 3. Database Management | 7. Operating Systems |
| 4. Object-Oriented Programming | 8. Computer Architecture |

Certifications

Introduction to Statistics <i>Stanford University</i>	Aug 2024
Mathematics for Machine Learning Specialization <i>Imperial College London</i>	Jun 2024
